## CLASSICSTYL

Le cornici in poliuretano per rifiniture d'interni  
Polyurethane mouldings for interior decoration  
Zierprofile aus Polyurethan zur Innendekoration  
Las molduras de poliuretano para el acabado interior

## AMERICANSTYL

Le cornici in "polistrutturato" ad altissima densità  
Very high density "polistrutturato" mouldings  
Zierprofile aus "polistrutturato" mit extrem hohem Raumgewicht  
Las molduras en "polistrutturato" de muy alta densidad

## NEWSTYL

I profili in polimeri estrusi ad alta densità  
High density extruded polymers profiles  
Profile aus extrudierten Polymeren mit hohem Raumgewicht  
Los perfiles en polímeros extruidos de alta densidad

## PROFILSTYL

I profili per la casa in "polistrutturato" ad altissima densità  
Very high density "polistrutturato" trimmings  
Profile & Sockelleisten aus "polistrutturato" mit extrem hohem Raumgewicht  
Los perfiles para el hogar en "polistrutturato" con muy alta densidad

## WOODSTYL

Le travi per rifiniture d'interni in poliuretano  
Polyurethane beams for interior decoration  
Balken aus Polyurethan zur Innendekoration  
Las vigas para el acabado interior en poliuretano

I profili in polimeri estrusi ad alta densità  
High density extruded polymers profiles  
Profile aus extrudierten Polymeren mit hohem Raumgewicht  
Los perfiles en polímeros extruidos de alta densidad

## ITALSTYL

Le cornici estruse in polistirene  
Polystyrene extruded mouldings  
Extrudierte Zierprofile aus Polystyrol  
Los marcos extruidos de poliestireno

## BRICKSTYL

Le cornici per esterno in polistirene rivestito  
Exterior mouldings, coated polystyrene  
Fassadenprofile aus beschichtetem Polystyrol  
Las molduras de exterior en poliestireno revestido

# LINEE

## EXTRASTYL

Le cornici estruse in polimeri espansi  
Expanded polymers mouldings  
Zierleisten aus expandierten Polymeren  
Las molduras en polímeros expandidos

## EUROSTYL

Le cornici in polistirene espanso  
Expanded polystyrene mouldings  
Zierprofile aus formgeschäumtem polystyrol  
Las molduras en poliestireno expandido

## TILESTYL

I pannelli per i soffitti in polistirene espanso  
Expanded polystyrene ceiling tiles  
Expandiertes Ps Deckenplatten  
Los paneles para los techos en poliestireno expandido

## STARSTYL

I pannelli a muro e i controsoffitti in polistirene espanso  
Expanded polystyrene false ceilings and wall panels  
Expandiertes Ps wandpaneelle und abgehängte decken  
Paneles murales y falsos techos en poliestireno expandido

Las placas aislantes

# LINES

**PU POLIURETANO → CLASSICSTYL - WOODSTYL**

Poliuretano resistente agli urti e di alta qualità

High quality polyurethane, shockproof

Hochwertiges Polyurethan, stoßfest

Poliuretano de alta calidad resistente a impactos

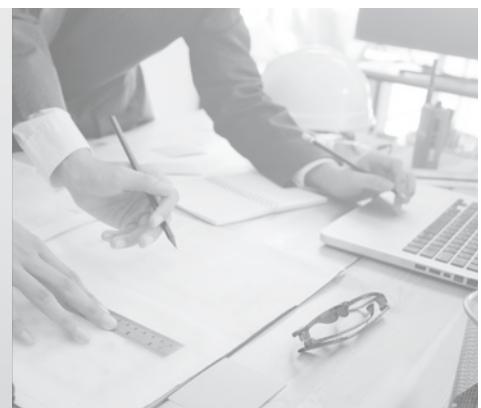

**HIPS POLISTRUTTURATO → AMERICANSTYL - PROFILSTYL - KRISTALSTYL**

Polimero estruso ad altissima densità, resistente agli urti

Highest density extruded polymer, shockproof

Extrudiertes Polymer mit höchster Dichte, stoßfest

Polímero extruido de densidad extremadamente alta, resistente a impactos

**HXPS POLIMERO ESTRUZO → NEWSTYL**

Polimero estruso ad alta densità, resistente agli urti

High density extruded polymer, shockproof

Extrudiertes Polymer mit hoher Dichte, stoßfest

Polímero extruido de alta densidad, resistente a impactos.

**XPS POLISTIRENE ESTRUZO → ITALSTYL**

Polistirene estruso di media densità, leggero ed economico

Medium density extruded polystyrene, lightweight and low cost

Extrudiertes Polystyrol mit mittlerer Dichte, leicht und kostengünstig

Poliestireno extruido de densidad media, ligero y económico

**EPS POLISTIROLO ESPANSO → EXTRASTYL - EUROSTYL - TILESTYL  
STARSTYL - OBJECTSTYL**

Polistirolo espanso di alta qualità, autoestinguente, pratico e leggero

Expanded polystyrene easy to handle, lightweight, high quality and self-extinguishing

Expandiertes Polystyrol, leicht, hochwertig und schwerentflammbar

Poliestireno expandido de alta calidad, autoextingüible, práctico y ligero

Dott. Ing. Bovelacci Marco

# CLASSICSTYL

Le cornici in poliuretano per rifiniture d'interni

Polyurethane mouldings for interior decoration

Zierprofile aus Polyurethan zur Innendekoration

Las molduras de poliuretano para el acabado interior

Eleganza e tradizione per questa linea di cornici, colonne, decorazioni, lesene e tutte le altre finiture dell'arte classica, perfette per ambienti dalle atmosfere d'altri tempi.

Elegance and tradition blend in this line of mouldings, columns, decorations, pilasters and other finishing elements typical of classical art, and perfect for old fashioned environments.

Eleganz und Tradition für diese Auswahl an Leisten, Säulen, Dekorationen, Lisenen und anderen Ausführungen der klassischen Kunst, perfekt für ein Ambiente im klassischen Stil aus alten Zeiten.

Elegancia y tradición para esta línea de molduras, columnas, pilastras y todas las otras decoraciones del arte clásica, ideales para ambientes con atmósfera de estilo antiguo.

# CLASSICSTYL

## LE CORNICI PER SOFFITTI

Cornici in poliuretano  
Lunghezza: 2 ml per asta  
Per i modelli decorati:  
2 ml per asta ~±2%.

Per l'installazione utilizzare  
Eurocoll Plus e chiodini in acciaio  
senza testa.

## CEILING MOULDINGS

Polyurethane mouldings  
Length: 2 lm  
Decorated patterns:  
2 lm ~±2%.

For installation use Eurocoll Plus  
and steel nails without head.

## ECKLEISTEN

Zierprofile aus Polyurethan  
Länge: 2 Meter  
Für die ornamentierten Modelle:  
2 Meter ~±2%.

Zum Fixieren der Leisten  
können Sie Eurocoll Plus und  
Stahlstifte verwenden.

## MOLDURAS PARA TECHOS

Molduras de poliuretano  
Longitud: 2 ml  
Para modelos decorados:  
2ml por varilla ~ ± 2%.

Para la instalación, utilice Eurocoll  
Plus y clavos de acero sin cabeza.

# AMERICANSTYL

Le cornici in “polistrutturato” ad altissima densità

Very high density “polistrutturato” mouldings

Zierprofile aus “polistrutturato” mit extrem hohem Raumgewicht

Las molduras en “polistrutturato” de muy alta densidad

Atmosfere americane con accenni country d'oltreoceano, per uno stile intramontabile e sempre in voga: cornici e angoli per pareti, soffitti, porte e pannellature che personalizzano e scaldano ogni ambiente.

A typical American countryside atmosphere, for a timeless style always in vogue: mouldings and corner elements for walls, ceilings, doors and panels to add warmth and a personal touch to any room.

Amerikanischer Stil mit Anklang zum Countrystil aus Übersee, für unvergängliche und stets moderne Räume: Leisten und Ecken für Wände, Decken, Türen und Paneele zur individuellen, gemütlichen Gestaltung eines jeden Raums.

Atmósferas americanas con aires de países de ultramar, para un estilo atemporal y siempre en boga: molduras y esquinas para paredes, techos, puertas y paneles que personalizan y calientan cualquier ambiente.

# WOODSTYL

Le travi per rifiniture d'interni in poliuretano  
Polyurethane beams for interior decoration  
Balken aus Polyurethan zur Innendekoration  
Las vigas para el acabado interior en poliuretano

Travi rustiche in poliuretano per donare calore e un tono rurale all'ambiente, capitelli, tasselli e lastre che ricreano tutta l'emozionante atmosfera del legno. In pochi gesti il soffitto si trasforma in un capolavoro dalle emozionanti tinte legnose.

Rustic polyurethane beams to give warmth and a rural tone to the environment, capitals, dowels and slabs that recreate all the exciting atmosphere of wood. In a few gestures the ceiling is transformed into a masterpiece with exciting woody colors.

Rustikale Polyurethanbalken, die der Umgebung Wärme und einen ländlichen Ton verleihen, Kapitelle, Dübel und Platten, die die aufregende Atmosphäre von Holz wiedergeben. Mit wenigen Handgriffen verwandelt sich die Decke in ein Meisterwerk mit aufregenden Holzfarben.

Vigas rústicas de poliuretano para dar calidez y tono rural al ambiente, capiteles, tacos y losas que recrean todo el apasionante ambiente de la madera. Con unos pocos gestos, el techo se transforma en una obra maestra con emocionantes colores amaderados.

## LE TRAVI RUSTICHE ANTICHE

Travi in poliuretano per rifiniture d'interni, non portanti lunghezza: 3 e 4,5 ml per trave.

## ANCIENT RUSTIC BEAMS

Polyurethane beams for interior decoration, not supporting length: 3 and 4,5 lm.

## ANTIK-RUSTIKALE BALKEN

Balken aus Polyurethan zur Innendekoration, nicht tragend Länge: 3 und 4,5 meter.

## LAS VIGAS RÚSTICAS ANTIGUAS

Vigas de poliuretano para acabado interior, no portante longitud: 3 y 4,5 ml por haz.

Le travi rustiche antiche BOVELACCI sono una fedele riproduzione degli antichi masselli di quercia, utilizzabili per creare ambienti rustici ed accoglienti, grazie alle loro perfette rifiniture e alla facilità di applicazione. Per il montaggio delle travi utilizzare Eurocoll Plus e tasselli grezzi per il montaggio.

BOVELACCI ancient rustic beams are a faithful reproduction of ancient oak beams, suitable to create charming country homes, thanks to their perfect finishing and easy assembling, through Eurocoll Plus and nogs.

BOVELACCI antik-rustikale Deckenbalken sind eine orginalgetreue Nachbildung alter Eichen-Balken, passend zum charmanten Landhaus-Stil. Dank der perfekten Verarbeitung einfach zu montieren mit Eurocoll Plus - Kleber und Einsatzstücken, die für den exakten Sitz des Balkens sorgen.

Las vigas rústicas antiguas de BOVELACCI son una fiel reproducción de los bloques de roble antiguo, que se pueden utilizar para crear ambientes rústicos y acogedores, gracias a su perfecto acabado y facilidad de aplicación. Para el montaje de las vigas utilice Eurocoll Plus y tacos para el montaje.

# EXTRASTYL

Le cornici estruse in polimeri espansi  
Expanded polymers mouldings  
Zierleisten aus expandierten Polymeren  
Las molduras en polímeros expandidos

Respiro contemporaneo e raffinata distinzione per queste cornici che aggiungono un tocco eclettico di attualità e armonia alle pareti e ai soffitti dalle linee più basic.

A distinctive, refined contemporary style for these mouldings that add a touch of modernity and harmony to walls and ceilings that were created with more simple lines.

Diese Profile verleihen den einfacheren Wänden und Decken mit ihrer zeitgenössischen und raffinierten Linienführung einen aktuellen Hauch und die richtige Harmonie.

Aliento contemporáneo y distinción refinada para estas molduras que añaden un toque ecléctico de actualidad y armonía a las paredes y techos con líneas más básicas.

# EXTRASTYL

## LE CORNICI PER SOFFITTI

Cornici in polimeri espansi con superficie trattata simile al colore bianco gesso.

Polistirene autoestinguente Euroclasse E  
Lunghezza: 2 ml per asta.

## CEILING MOULDINGS

Expanded polymer mouldings with external surface treated plaster-like white colour.

# EUROSTYL

**Le cornici in polistirene espanso  
Expanded polystyrene mouldings  
Zierprofile aus formgeschäumtem polystyrol  
Las molduras en poliestireno expandido**

Lo stile classico incontra quello moderno in una linea dal respiro europeo: rosoni, cornici, angoli, lesene, mensole, fregi e nasi che uniscono con maestria le forme tradizionali ai tratti più contemporanei.

Classic blends with modern style, in this line that is destined to the European markets: rosettes, mouldings, corner elements, pilasters, corbels, friezes that combine tradition with modernity with masterly skills.

Der klassische Stil trifft in einer europäischen Version auf die Moderne: Rosetten, Leisten, Eckleisten, Lisenen, Konsolen, Friese und Ecken vereinen traditionelle Formen auf gewisse Weise mit zeitgenössischen Linien.

El estilo clásico encuentra lo moderno en una línea con aires europeos: rosetones, molduras, elementos angulares, pilastras, ménsulas, frisos y rincones que unen con maestría formas tradicionales a elementos más contemporáneos.

# STARSTYL

I pannelli a muro e i controsoffitti in polistirene espanso

Expanded polystyrene false ceilings and wall panels

Expandiertes Ps wandpaneelle und abgehängte decken

Paneles murales y falsos techos en poliestireno expandido

I soffitti delle case più eleganti e prestigiose con i controsoffitti Starstyl. Linee classiche nella tradizione delle nobili residenze, linee moderne firmate dal design italiano per accogliere le necessarie strutture funzionali.

Starstyl false ceilings, for the most refined, elegant homes. Lines with classic features and a traditional style recalling noble residences are available alongside with more modern lines created by Italian designers to accommodate structural functions.

Die Decken der elegantesten und edelsten Häuser werden mit Starstyl-Deckenplatten erzielt. Die ganz im Sinne der Tradition nobler Residenzen stehenden klassischen Linien sowie auch die modernen Linien mit italienischen Design sorgen für genügend Stauraum für funktionelle Einrichtungen.

Los techos de las casas más elegantes y prestigiosas con techos Starstyl. Líneas clásicas en la tradición de las residencias nobles, líneas modernas firmadas por el diseño italiano para acomodar las estructuras funcionales necesarias.

# HISOSTYL

Le lastre isolanti  
Insulation sheets  
Isolationsmaterial  
Las placas aislantes

# HISOSTYL

Le lastre isolanti ad alta densità che preservano efficacemente l'equilibrio termico e il benessere di tutta la casa; possono essere utilizzate su pareti, soffitti e pavimenti, riducendo così i consumi dedicati alla climatizzazione per garantire un elevato risparmio energetico.

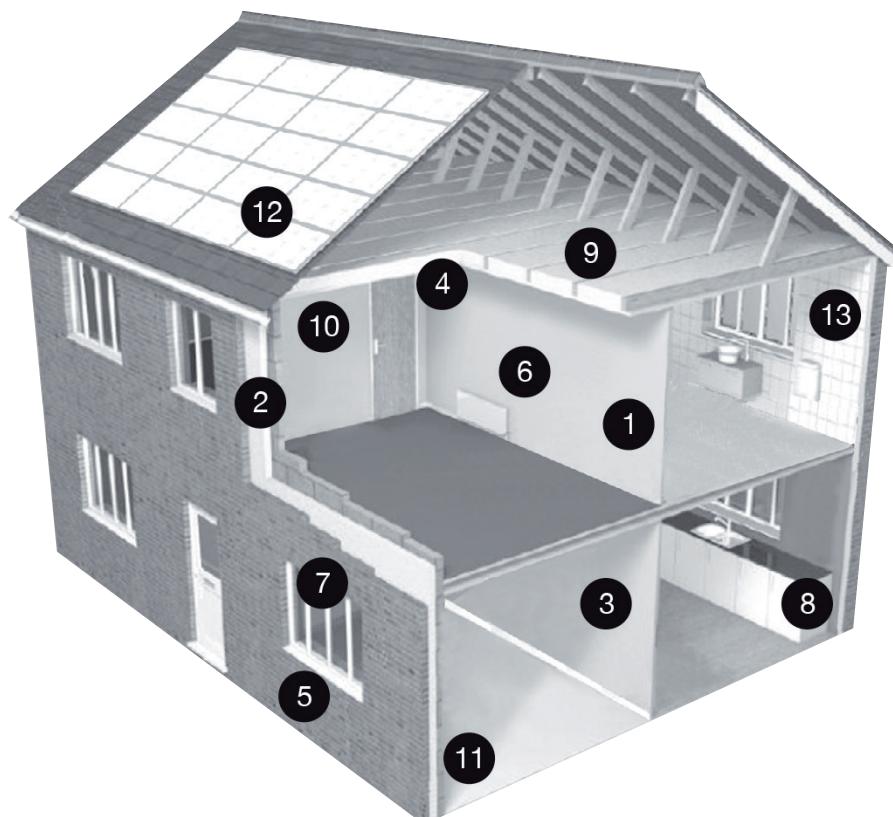

These high-density insulation boards effectively preserve the thermal equilibrium and the comfort inside the whole house. They can be used for the walls, the ceilings and the floors, thus reducing air conditioning costs and providing high energy savings.

Wärmeisolierende Platten mit hoher Dichte sorgen für ein wirksames Temperaturgleichgewicht und Wohlbefinden im ganzen Haus. Die Platten können auf Wänden, Decken und Fußböden verwendet werden, was zur Reduzierung der Klimatisierungskosten führt und eine hohe Energieeinsparung mit sich bringt.

Las láminas aislantes de alta densidad que preservan eficazmente el equilibrio térmico y el bienestar de toda la casa; se pueden utilizar en paredes, techos y suelos, reduciendo así el consumo dedicado a la climatización para asegurar un alto ahorro energético.

TABELLA CONFRONTI ISOLAMENTO

CLIMAPRON PLUS	LEGNO	CALCESTRUZZO ALLEGGERITO	MURO IN MATTTONI	MURO IN CALCESTRUZZO
3 mm	ca. 12 mm	ca. 20 mm	ca. 80 mm	ca. 200 mm
6 mm	ca. 24 mm	ca. 40 mm	ca. 160 mm	ca. 400 mm
9 mm	ca. 36 mm	ca. 60 mm	ca. 240 mm	ca. 600 mm
4 mm	ca. 16 mm	ca. 27 mm	ca. 107 mm	ca. 270 mm
7 mm	ca. 28 mm	ca. 47 mm	ca. 187 mm	ca. 470 mm

DOVE SI USA IL CLIMAPRON PLUS

1. Su pareti divisorie fredde
2. Su pareti fredde (anche di cantine) ed umide
3. In presenza di crepe sull'intonaco e in presenza di ponti termici
4. Negli angoli di stanze (muffa)
5. Sugli architravi di porte e finestre
6. Nelle nicchie dei termosifoni per perdita di calore degli stessi
7. Sopra e dentro i cassonetti degli avvolgibili
8. Dietro a mobili
9. Sui soffitti
10. Sotto pannelli di altro materiale (sughero) e sotto il parquet e laminato e per molte altre applicazioni
11. Come base per il riscaldamento a pavimento
12. Sulle falde del tetto
13. Sotto il perlinato e le ceramiche

## CLIMAPRON PLUS 4 e 7 mm RIGATO

Lastre isolante in polistirene estruso ad alta densità con dorso scanalato, utilizzabili come sottoparato ed in combinazione con perlinato, ceramica, parquet.

Lastre pieghevoli da 2 m<sup>2</sup>  
Dim. 80x250 cm  
Spessore: 4 e 7 mm

Klapptable von 2 m<sup>2</sup>  
Größe 80x250 cm  
Dicke: 4 und 7 mm

## CLIMAPRON PLUS 4 and 7 mm STRIPED

Insulating sheet in extruded high-density polystyrene with grooved back, usable as an underlay and in combination with matchboard, ceramic, parquet.

Folding slabs of 2 m<sup>2</sup>  
Size 80x250 cm  
Thickness: 4 and 7 mm

Placas plegables de 2 m<sup>2</sup>  
Tamaño 80x250 cm  
Espesor: 4 y 7 mm

## CLIMAPRON PLUS 4 und 7 mm GESTREIFT

Isolierfolie aus extrudiertem Polystyrol hoher Dichte mit gerilltem Rücken, als Unterlage verwendbar und in Kombination mit Streichholz, Keramik, Parkett.

## STRONG Climapron

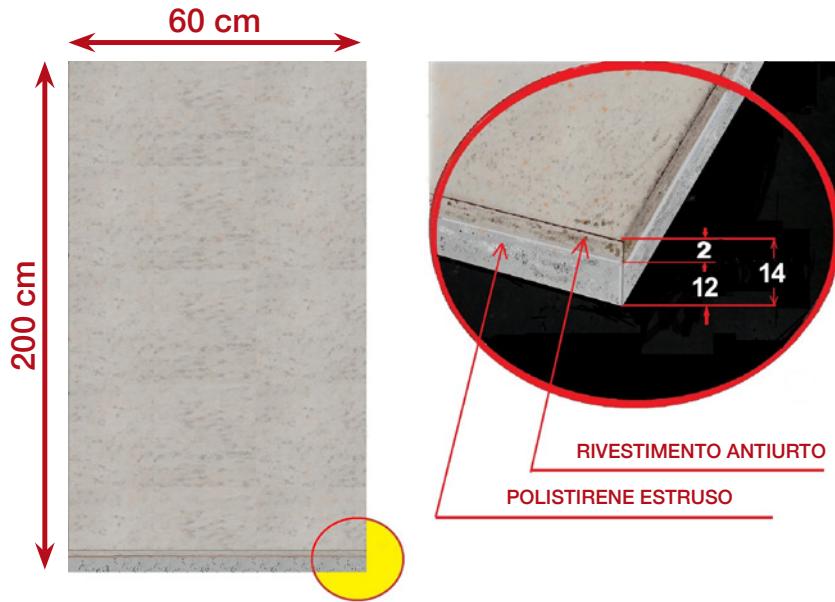

Il Climapron Strong innalza rapidamente, con l'afflusso del calore, la temperatura delle superfici su cui è applicato, grazie al materiale di cui è composto: polistirene estruso ad alta densità (XPS) privo di CFC, riducendo al minimo i costi del riscaldamento. I pannelli di Climapron Strong resistono alla pressione e offrono un isolamento termico ideale come cappotti interni.

Climapron Strong rapidly raises, with the influx of heat, the temperature of the surfaces on which it is applied, thanks to the material it is made of: CFC-free extruded high-density polystyrene (XPS), minimizing heating costs. Climapron Strong panels resist pressure and offer thermal insulation ideal as inner coats.

Climapron Strong erhöht mit dem Einströmen von Wärme schnell die Temperatur der Oberflächen, auf die es aufgebracht wird, dank des Materials, aus dem es besteht: FCKW-freies extrudiertes Polystyrol hoher Dichte (XPS), wodurch die Heizkosten minimiert werden.

Climapron Starke Paneele halten dem Druck stand und bieten eine Wärmeisolierung, die sich ideal als Innenbeschichtung eignet.

Climapron Strong eleva rápidamente, con la entrada de calor, la temperatura de las superficies sobre las que se aplica, gracias al material del que está compuesto: poliestireno extruido de alta densidad (XPS) sin CFC, minimizando los costes de calefacción. Los paneles Climapron Strong resisten la presión y ofrecen un aislamiento térmico ideal como capas interiores.

<b>SOVRAVERNICIABILITÀ</b>	Sì. Applicare un fondo di riempimento per facciate a base d'acqua. Successivamente tinteggiare con vernici elastiche senza solventi a base d'acqua o acriliche.	

## PREPARAZIONE

Assicurarsi che la parete sia pulita e senza tracce di grassi; eventuali vecchie carte da parati sono da staccare. Trattare le muffe esistenti con un prodotto antimuffa. Stuccare le superfici danneggiate con uno stucco di riempimento. Verificare la tenuta della pittura ed eventualmente applicare uno strato di fissativo.

## APPLICAZIONE DEI PANNELLI

Con una spatola dentata, disporre uno strato uniforme di alcuni mm di Eurocoll Plus sulla parete e/o soffitto.

Mediante una leggera pressione, attaccare le lastre e fare aderire utilizzando un panno morbido o un rullo di gomma.

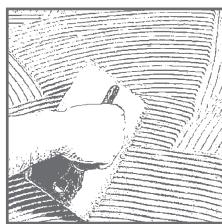

Applicare ove necessario chiodini in acciaio. Se la colla dovesse uscire dalle giunture, lavare subito con una spugna umida.

Applicare nelle giunture una schiuma poliuretanica per polistirolo.

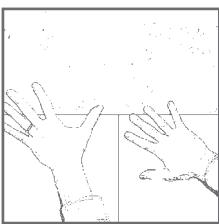

Dopo una settimana, rimepere ogni giunta o spazio con schiuma poliuretanica per polistirolo.

Con un cutter togliere, una volta asciutta, la schiuma poliuretanica in eccesso.

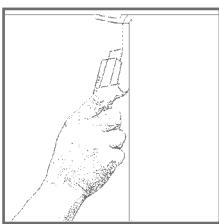

L'incidenza media del collante Eurocoll Plus è di circa 1kg x 1m<sup>2</sup>.

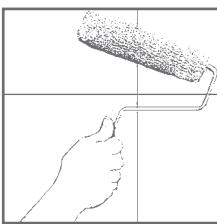

Appicare Eurocoll Plus sulla superficie desiderata utilizzando una spatola dentata.

Porre il pannello di Climapron Strong con il retro in polistirene sulla colla ancora bagnata e passare con il rullo di gomma. Fare fuoriuscire ai lati le bolle d'aria eventualmente formatesi.

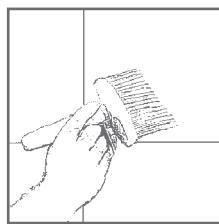

Attaccare il successivo pannello di Climapron Strong ponendo una schiuma poliuretanica per polistirolo sulle giunte fra un pannello e l'altro. Una volta asciutta, togliere con un cutter la schiuma poliuretanica in eccesso.

Passare in modo uniforme il rullo sugli spigoli tagliati.

Gli adesivi e i punti adesivi applicati successivamente devono asciugare bene. Si consiglia di controllare l'asciugatura del Climapron Strong in più punti mediante tentativi di distacco.

Appicare con il rullo un fondo di riempimento per facciate a base d'acqua. Successivamente tinteggiare con vernici elastiche senza solventi a base d'acqua o acriliche.

**CLIMAPRON AE  
4 e 7 mm**

Fogli termoisolanti in polistirene espanso stampato ad alta densità (a celle chiuse), autoestinguente, Euroclasse E, utilizzabili come sottoparato ed in combinazione con perlinato, ceramica, parquet o per isolamenti a cappotto per interni.

**CLIMAPRON AE  
4 and 7 mm**

Insulating sheets made of high density expanded PS, self extinguishing, Euroclass E, conceived for insulating purpose in combination with wallpaper or wood coating, ceramic, parquet or internal insulating systems.

**CLIMAPRON AE  
4 und 7 mm**

Wärmeisolierende Platten aus hoch verdichtetem Polystyrol, geprägt aus expandierbarem Polystyrol EPS, schwerentflammbar – B1 DIN 4102, verwendbar als Isolierung in Kombination mit Tapeten, Spundbelag, Keramik, Parkett oder Innenverkleidungen.

**CLIMAPRON AE  
4 y 7 mm**

Láminas de aislamiento térmico en poliestireno expandido moldeado de alta densidad (celda cerrada), autoextingüible, Euroclase E, utilizables como contrapisos y en combinación con revestimientos, cerámica, parquet o para sistemas de aislamiento para interiores.

La cubiera in polistirolo espanso è stata studiata per sostituire la normale cubiera in metallo, assicurandovi tutta una serie di vantaggi per la stagionatura dei provini in calcestruzzo:

- ottimo isolamento termico ed eccellente protezione dei vostri provini con adeguata conservazione dell'umidità
- rinforzo a croce sui lati base per garantire una maggior resistenza contro la rottura
- protezione dei provini garantita da appositi fori per la sigillatura della cubiera contro eventuali manomissioni
- predisposizione di particolari incavi per favorire una comoda presa ed un semplice stoccaggio facilitato anche dall'inserimento di 8 piedini ad incastro
- targhetta prestampata per la firma della D.L.
- coperchio realizzato con un incavo per evitare il possibile incollaggio del calcestruzzo al coperchio stesso
- quota interna tale da compensare il calo del calcestruzzo durante la presa.

## MATERIALI PER IL MONTAGGIO

## ASSEMBLING MATERIALS

## MONTAGE MATERIALIEN

## MATERIALES DE MONTAJE

È preferibile posare le cornici, gli angoli ed i rosoni prima di tappezzare le pareti. I prodotti devono essere applicati su pareti asciutte, pulite e sgrassate. Sono sufficienti i seguenti accessori: cassetta per taglio, sega speciale Bovelacci, Eurocoll Plus, spatola, spugna, pittura, pennelli, cutter e metro.

We suggest to install mouldings, corners and roses before wallpapering. Items must be applied on dry clean and ungreased surfaces. You need only the following tools: mitre-box, Bovelacci special saw, glue Eurocoll Plus, spatula, sponge, paint, brush, cutter and metre.

Wir empfehlen die Zierprofile, Ecken, Rosetten nach Möglichkeit vor den Tapezierarbeiten zu verkleben. Der Untergrund muss saugfähig, sauber, trocken und staubfrei sein. Folgende Werkzeuge werden benötigt: Gehrungslade, Bovelacci-Spezialsäge, Eurocoll Plus-Klebstoff, Spachtel, Schwamm, Farbe, Pinsel, Cuttermesser und ein Zollstock.

Es preferable colocar las molduras, angulos y rosetones antes de empapelar las paredes. Los productos deben aplicarse sobre paredes secas, limpias y desengrasadas. Los siguientes accesorios son suficientes: caja de corte, sierra especial Bovelacci, Eurocoll Plus, espátula, esponja, pintura, pinceles, cíter y cinta métrica.

**IL COLLANTE:****EUROCOLL PLUS**

Collante speciale per polistirene, poliuretano e polistrutturato in pasta bianca (incidenza media: 1 cart. x 8 ml)

Temperatura di applicazione:  
+8 °C ÷ +30 °C

Temperatura d'impiego ad essiccazione avvenuta:  
0 °C ÷ +55 °C

Conservazione: 10 mesi

Terme il gelo

Lasciare asciugare per una settimana, poi stuccare con Eurocoll Plus e rifinire con una vernice a base d'acqua.

Prima del montaggio si consiglia di testare la colla sul sottofondo.

**GLUE:****EUROCOLL PLUS**

Special adhesive for polystyrene, polyurethane and polistrutturato white paste (average incidence: 1 cart. x 8 lm)

Application temperature:  
+8 °C ÷ +30 °C

Temperature stability

0 °C ÷ +55 °C

Shelf life: 10 months

Keep away from chill

Let dry for a week, before filling up the joints with Eurocoll Plus and finishing with water-based paint

Testing glue before applying is recommended.

**KLEBER:****EUROCOLL PLUS**

Spezial-Klebstoff für Polystyrol, Polyurethan und Polistrutturato weiss, pastös (durchschnittlicher Verbrauch: 1 Kart. x 8 ml)

Verarbeitungstemperatur:  
+8 °C ÷ +30 °C

Temperaturbeständigkeit:

0 °C ÷ +55 °C

Lagerstabilität: 10 Monate

Nach einer Trocknungszeit von einer Woche können die Fügen mit Eurocoll Plus gefüllt werden und mit Dispersionsfarbe oder Acryllack überstrichen werden

Vor der Montage testen Sie bitte mit einem kl. Musterstück die Festigkeit des Klebers auf dem Untergrund.

**ADHESIVO:****EUROCOLL PLUS**

Pegamento especial para poliestireno, poliuretano y polistrutturato (incidencia media: 1 cart. X 8 ml)

Temperatura de aplicación:  
+8 °C ÷ +30 °C

Temperatura de empleo después del secado:

0 °C ÷ +55 °C

Conservación: 10 meses

Proteger de las heladas

Déjelo secar durante una semana, luego estucar con Eurocoll Plus y termine con una pintura a base de agua.

Antes del montaje, se recomienda probar el pegamento sobre el sustrato.

**BST2 STUCCO Kg 2**

Lo stucco BST2 è da utilizzare solo per la stuccatura delle giunte e non per l'incollaggio.  
Incidenza media: 1 kg x 20 ml  
Per l'incollaggio si consigliano colle acriliche a base cementizia per rivestimenti esterni e l'utilizzo dei tappi ad espansione.

**BST2 STUCCO Kg 2**

BST2 STUCCO: use only as a filler, not as an adhesive.  
Average incidence: 1 kgs x 20 lm  
As adhesive, we suggest acrylic glues for outside use and expanding nails.

**BST2 STUCCO Kg 2**

BST2 STUCCO: nur als Füllstoff und nicht als Kleber benutzen. Mittlerer Verbrauch: ca. 1 kg / 20 mtr.  
Als Kleber empfehlen wir einen Kleber auf Acrylbasis für Aussenverklebungen.

**BST2 STUCCO Kg 2**

La masilla BST2 se debe utilizar solo para estucar los juntos y no para pegar.  
Incidenza media: 1 kg x 20 ml  
Para pegar, recomendamos colas acrílicas a base de cemento para revestimientos externos y el uso de tapas de expansión.

## CLASSICSTYL - AMERICANSTYL - NEWSTYL - PROFILSTYL - ITALSTYL - EUROSTYL - EXTRASTYL

**1.** Iniziare a tagliare le cornici in modo da realizzare gli angoli che vi servono. Controllate che combinino.

**1.** Cut straight ends to make the type of corners you need. Check fit.

**1.** Beim Schneiden der Gehrung ist unbedingt darauf zu achten, dass die "Deckenklebefläche" des Zierprofils auf dem Boden und die "Wandklebefläche" an der Innenwand der Gehrungslade liegt.

**1.** Cortar las molduras para obtener los ángulos que necesita. Asegurarse que combinen.

**2.** Stendere la colla speciale Eurocoll Plus (temperatura di applicazione da +8°C a +30°C) su entrambe le superfici posteriori dell'asta che andranno a contatto con la parete o il soffitto, nonché fra le giunture (incidenza media: 1 cart. x 8 ml).

**2.** Apply the special glue Eurocoll Plus on both back surfaces of the stick (application temperature from +8°C to +30°C) meant to lean on the wall and inside the joint (average incidence: 1 cart. x 8 lm). Use Eurocoll Plus and steel nails every 40 cm.

**2.** Nachdem die Gehrung auf Passgenauigkeit geprüft wurde, wird der Klebstoff Eurocoll Plus (Verbrauchstemperatur +8°C +30°C) auf beide Klebeflächen und im Stoßbereich mit der Kartusche oder mit dem Spachtel aufgetragen (durchschnittlicher Verbrauch: 1 Kart. x 8 ml). Befestigen mit Stahlnägeln alle 40 cm.

**2.** Aplicar el adhesivo especial Eurocoll Plus (temperatura de aplicación de + 8 °C a + 30 °C) en ambas las superficies posteriores de las varillas que se pegarán a la pared o al techo y entre las juntas. (incidencia media: 1 cartucho x 8 ml). Usar Eurocoll Plus y clavos de acero cada 40 cm.

**3.** Appicare la cornice alla parete con una leggera pressione. Dopo una settimana riempite con Eurocoll Plus ogni giuntura o spazio.

**3.** Press pieces into the corner with a light pressure. After a week fill all joints and gaps with Eurocoll Plus.

**3.** Das Zierprofil passgenau ansetzen und vorsichtig andrücken. Nach einer Woche alle Fugen und Stöße mit Eurocoll Plus füllen.

**3.** Presionar levemente la moldura a la pared. Después de una semana sellar cada junta y espacio con Eurocoll Plus.

**4.** Togliete l'eccesso di colla con l'aiuto di una spatola.

**4.** Remove glue in excess by using a spatula.

**4.** Überschüssigen Klebstoff mit einem Spachtel sofort entfernen.

**4.** Quitar el exceso de cola con una espátula

**5.** Pulite quindi con l'aiuto di una spugna umida e pulita.

**5.** Wipe smooth with a clean damp sponge.

**5.** Anschließend Klebstoffreste mit einem feuchten Schwamm sofort abwaschen.

**5.** Limpiar con ayuda de una esponja limpia y húmeda.

**6.** Lasciate asciugare poi rifinite con vernice a base d'acqua.

**6.** Let dry and then apply water-based paint.

**6.** Die Zierprofile können nach der Trocknungszeit mit Dispersionsfarbe oder Acryllack überstrichen werden.

**6.** Dejar que seque y luego terminar con pintura a base de agua.

**7. Per luci LED:** prima dell'installazione verniciare il retro delle cornici con vernice a base d'acqua di colore nero.

**7. For LED lights:** before installation, paint the back of the mouldings with black water-based paint.

**7. Bei LED-Leuchten:** Vor der Verarbeitung die Rückseite der Zierleiste mit schwarzer Farbe auf Wasserbasis streichen

**7. Para luces LED:** antes de la instalación, pinte la parte posterior de las molduras con pintura negra a base de agua.

I ROSONI

CEILING CENTRES

ROSETTEN

ROSETONES

1

2

3

**EUROSTYL - CLASSICSTYL**

1. Praticare col cutter un foro centrale nel rosone se è prevista l'applicazione di un lampadario.

2. Appicare la speciale colla Eurocoll Plus lungo la circonferenza.  
Utilizzare chiodini in acciaio ogni 40 cm.

3. Appoggiare il rosone al soffitto nel punto desiderato. Per stuccare usare Eurocoll Plus. Verniciare con idropitture.

1. Make a central hole in the middle of the ceiling centre by using a cutter.

2. Apply the special Eurocoll Plus glue around the circumference. Use Eurocoll Plus and steel nails every 40 cm.

3. Lean the centre on the ceiling. To fill all gaps use Eurocoll Plus glue.  
Apply water-based paint.

1. Um eine Öffnung für ein Lampenkabel zu erhalten, wird die passende Größe mit einem Cutter herausgeschnitten.

2. Ausreichend Eurocoll Plus-Kleber am Rand der Rosette auftragen.  
Befestigen mit Stahlnägeln alle 40 cm.

3. Die Rosette passgenau ansetzen und vorsichtig andrücken. Fugen mit Eurocoll Plus-kleber füllen.  
Nach ausreichender Trocknung des Klebers kann die Rosette gestrichen werden.

1. Haga un agujero central en el rosetón con el cortador si se va a colocar una lámpara de araña.

2. Aplique el pegamento especial Eurocoll Plus a lo largo de la circunferencia.  
Usar Eurocoll Plus y clavos de acero cada 40 cm.

3. Apoye el rosetón en el techo en el punto deseado. Para el rejuntado utilizar Eurocoll Plus.  
Pintar con pinturas a base de agua.

**BRICKSTYL**

Assicurarsi che il muro sia pulito e senza tracce di grassi.  
Verificare la tenuta della pittura ed eventualmente applicare uno strato di fissativo.

Tagliare le cornici in modo da realizzare gli angoli che vi servono, verificando che coincidano.

Applicare una colla speciale acrilica a base cementizia per rivestimenti esterni lungo le superfici posteriori dell'asta e sulle giunture. Mediante una leggera pressione applicare la cornice alla parete. Utilizzare anche tappi ad espansione.  
Lasciare asciugare.

Dopo una settimana riempire ogni giuntura o spazio con stucco Bovelacci tipo BST2 (incidenza media stucco per le cornici: 1kg. X 20 ml).

Rimuovere quindi lo stucco in eccesso con una spugna bagnata.

Lasciare asciugare e rifinire con Pitture elastomeriche a base d'acqua.

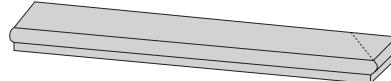

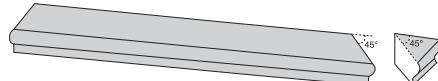

Examine your ceiling to be sure that it is clean and free of any grease. Verify the painted surface and if necessary apply a primer. Cut straight ends to make the type of corners you need, checking that they match. Apply a special acrylic and cement-based glue for external covering on the hind surfaces of the staff and on the joints. Press the moulding to the wall with a light pressure. Use also wall plugs. Let it dry. After a week fill all the joints or gaps with BST2 Bovelacci stucco (average incidence of stucco for mouldings: 1kg x 20 lm). Remove the stucco in excess by using a damp sponge. Let it dry and finish with water-based elastomeric paints.

Prüfen Sie ob die Wand sauber und frei von Öl, Fett und Lacken ist. Prüfen Sie die Tragfähigkeit der Farbe und tragen Sie ggf. eine Schicht Tiefengrund auf. Zierleisten auf die benötigte Gehrung zuschneiden und diese auf Passgenauigkeit prüfen. Einen speziellen Acrylklebstoff auf Zementbasis für Außenverkleidungen auf die Rückseite und im Stoßbereich der Leiste auftragen. Das Zierprofil passgenau an die Wand ansetzen und vorsichtig andrücken. Zur zusätzlichen Befestigung können auch Spreizdübel verwendet werden. Trocknen lassen und nach einer Woche alle Fugen und Stöße mit Bovelacci-Kitt BST2 füllen (durchschnittlicher Verbrauch für die Zierleisten: 1 kg. x 20 lfm). Überschüssigen Kitt mit einem feuchten Schwamm entfernen. Nach ausreichender Trocknung der Kitts mit einer Elastomer Farbe auf Wasserbasis für den Außenbereich überstreichen.

Asegúrese de que la pared esté limpia y sin grasa.  
Compruebe el sellado de la pintura y si es necesario aplique una capa de fijador.

Corta las molduras para hacer las esquinas que necesitas, asegurándote de que coincidan. Aplique un pegamento acrílico especial a base de cemento para revestimientos externos a lo largo de las superficies traseras de la varilla y en las juntas. Con una ligera presión, aplique la moldura a la pared. Utilice también tapones de expansión.  
Déjé secar.

Pasada una semana, llenar cada junta o espacio con masilla Bovelacci tipo BST2 (incidencia media del estuco para las molduras: 1 kg. X 20 ml).  
Luego retire el exceso de lechada con una esponja húmeda.  
Deje secar y termine con pinturas elastoméricas a base de agua.

## LE ISTRUZIONI PER IL MONTAGGIO

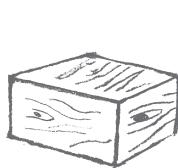

## ASSEMBLING INSTRUCTIONS

## VERARBEITUNGSTIPS

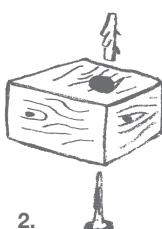

## INSTRUCCIONES DE MONTAJE

## WOODSTYL

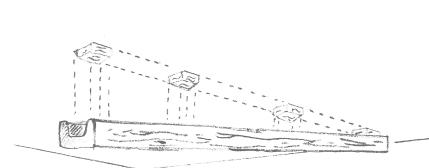

- Utilizzare i tasselli
- Forare e fissare al soffitto i tasselli
- Utilizzare un tassello ogni metro
- Fissare la trave con viti dopo aver steso Eurocoll Plus nelle zone di contatto della trave con il soffitto
- Usare la fascia chiodata per le giunture

1.

2.

3.

4.

5.

## TILESTYL

**1.** Assicurarsi che il soffitto sia pulito e senza tracce di grassi; eventuali vecchie carte da parati sono da staccare. Verificare la tenuta della pittura ed eventualmente applicare una mano di fissativo.

**2.** Iniziare la messa in opera dei pannelli dal centro. Se l'ambiente è molto grande o se il soffitto presenta una forte irregolarità, è consigliabile posare i pannelli secondo una direzione diagonale, per una migliore resa estetica. Con una spatola, disporre uno strato di Eurocoll Plus lungo il bordo ed al centro del pannello (vedi figura in basso a sinistra). L'incidenza media del collante è di circa 1 Kg x 2 mq. Utilizzare chiodini in acciaio ogni 40 cm.

**3.** Mediante una leggera pressione, attaccare i pannelli al soffitto. Per tagliare i pannelli si può usare un cutter. Se la colla dovesse uscire dalle giunture, lavare subito con una spugna umida.

**4.** I pannelli per soffitti Bovelacci possono essere dipinti con una normale pittura ad acqua, reperibile presso il colorificio di fiducia.

**1.** Make sure the ceiling is clean and free of grease; any old wallpapers need to be peeled off. Check the seal of the paint and if necessary apply a coat of fixative.

**2.** After the ceiling has been thoroughly cleaned and a careful measurement, keep mounting the tiles from the centre of the ceiling, working outward; apply a coat of Eurocoll Plus, onto the back of the panel, around the border and in the centre (see illustration below left). Average incidence of Eurocoll Plus is about 1 kg x 2 sq.m. Use Eurocoll Plus and steel nails every 40 cm.

**3.** Through a light pressure, fix the tiles to the surface; You may cut tiles by size with a common cutter. Be careful that the glue doesn't come outside the junction of tiles: in case, wipe off the excess glue with a damp sponge.

**4.** Bovelacci tiles may be painted with common water based paints.

**1.** Stellen Sie sicher, dass die Decke sauber und fettfrei ist; Alle alten Tapeten müssen abgezogen werden. Überprüfen Sie die Versiegelung des Lacks und tragen Sie gegebenenfalls eine Schicht Fixiermittel auf.

**2.** Starten Sie die Installation der Paneele von der Mitte aus. Wenn der Raum sehr groß ist oder die Decke eine starke Unregelmäßigkeit aufweist, empfiehlt es sich, die Platten diagonal zu verlegen, um ein besseres ästhetisches Ergebnis zu erzielen. Mit einem Spachtel eine Schicht Eurocoll Plus entlang der Kante und in der Mitte der Platte auftragen (siehe Abbildung unten links). Der durchschnittliche Leimvorfall beträgt ca. 1 kg x 2 m2. Befestigen mit Stahlnägeln alle 40 cm.

**3.** Bringen Sie die Paneele mit leichtem Druck an der Decke an. Zum Schneiden der Platten kann ein Cutter verwendet werden. Sollte der Kleber aus den Fugen austreten, sofort mit einem feuchten Schwamm abwaschen.

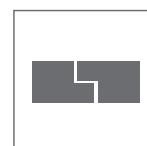

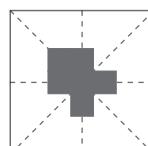

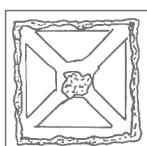

**4.** Die Bovelacci-Deckenpaneele können mit einer normalen Farbe auf Wasserbasis lackiert werden.

**1.** Asegúrese de que el techo esté limpio y sin grasa; cualquier papel pintado viejo debe ser despegado. Compruebe la estanqueidad de la pintura y, si es necesario, aplique una capa de fijador.

**2.** Comience la instalación de los paneles desde el centro. Si la habitación es muy grande o si el techo tiene una fuerte irregularidad, es recomendable colocar los paneles en dirección diagonal, para un mejor resultado estético. Con una espátula, coloque una capa de Eurocoll Plus a lo largo del borde y en el centro del panel (ver figura abajo a la izquierda). La incidencia media del pegamento es de aproximadamente 1 kg x 2 m2. Usar Eurocoll Plus y clavos de acero cada 40 cm.

**3.** Con una ligera presión, fije los paneles al techo. Se puede utilizar un cortador para cortar los paneles. Si el pegamento sale de las juntas, lavar inmediatamente con una esponja húmeda.

**4.** Los paneles de techo Bovelacci se pueden pintar con una pintura a base de agua.

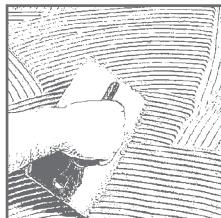

## HISOSTYL

Assicurarsi che la parete e/o il soffitto sia pulito e senza tracce di grassi; eventuali vecchie carte da parati sono da staccare. Verificare la tenuta della pittura ed eventualmente applicare uno strato di fissativo. Con una spatola dentata, disporre uno strato uniforme di alcuni mm di Eurocoll Plus sulla parete e/o soffitto. Mediante una leggera pressione attaccare le lastre e farle aderire utilizzando un panno morbido. Applicare ove necessario chiodini in acciaio. Per tagliare le lastre si può usare un cutter. Se la colla dovesse uscire dalle giunture, lavare subito con una spugna umida. Dopo una settimana riempire ogni giuntura o spazio con Eurocoll Plus. L'incidenza media del collante è di circa 1 kg x 1 mq.

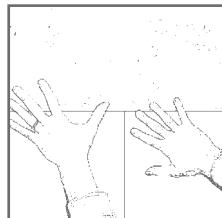

Examine your ceiling to be sure that it is clean and free of any oil, grease and varnishes. Remove old ceiling paper, if present. Verify the painted surface and in case apply a primer. Apply a uniformed layer of Eurocoll Plus about few mm using a spatula, on the wall and/or ceiling. Stick the sheets with a light pressure and press them with a soft cloth. In case of need use also steel nails. Use a cutter to cut the sheets. If the glue flows from the joint, wipe quickly with a clean damp sponge. After a week, fill all the joint with Eurocoll Plus. Average incidence of Eurocoll Plus is about 1 kg x 1 sq.m.

Prüfen Sie ob die Wand und/oder Decke sauber und frei von Öl, Fett oder Lacken ist; vorhandene Tapeten sollten vorher entfernt werden. Prüfen Sie die Tragfähigkeit der Farbe und tragen Sie ggf. eine Schicht Fixiermittel auf. Tragen Sie mit einem Zahnpachtel eine gleichmäßige, wenige Millimeter dicke Schicht Eurocoll Plus-Kleber auf die Wand und/oder Decke auf. Die Platten mit leichtem Druck fixieren und mit Hilfe eines weichen Lappens feststreichen. Wenn nötig zusätzlich mit Spikjer aus Stahl befestigen. Zum Schneiden der Platten reicht ein herkömmliches Cuttermesser. Eventuell aus den Fugen austretenden Kleber sofort mit einem feuchten Schwamm entfernen. Nach einer Woche alle Fugen und Stöße mit Eurocoll Plus-Kleber füllen. Durchschnittlicher Klebstoffverbrauch: ca. 1 kg x 1 qm.

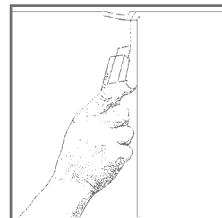

Asegúrese de que la pared y / o el techo estén limpios y sin rastros de grasa; cualquier papel pintado viejo debe ser despegado. Compruebe el sellado de la pintura y si es necesario aplique una capa de fijador. Con una espátula dentada, coloque una capa uniforme de unos mm de Eurocoll Plus en la pared y / o techo. Con una ligera presión, pegue las placas y haga que se adhieran con un paño suave. Aplique clavos de acero donde sea necesario. Se puede utilizar un cortador para cortar las losas. Si el pegamento se sale de las juntas, lavar inmediatamente con una esponja húmeda. Después de una semana, rellene todas las juntas o espacios con Eurocoll Plus. La incidencia media de la cola es de aproximadamente 1 kg x 1 m2.

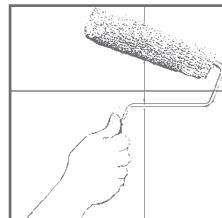

Appicare Eurocoll Plus sulla superficie desiderata utilizzando una spatola dentata.

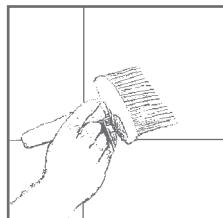

Porre il pannello di Climapron Plus con il retro ruvido sulla colla ancora bagnata e passare con il rullo di gomma. Fare fuoriuscire ai lati le bolle d'aria eventualmente formatesi.

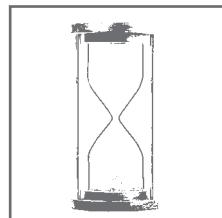

Attaccare il successivo pannello di Climapron Plus in modo ermetico sul giunto oppure sovrapponendolo al precedente e tagliando l'eccesso. Per tagliare il Climapron Plus utilizzare un cutter.

Passare in modo uniforme il rullo sugli spigoli tagliati. Le stuccature possono essere realizzate sempre con Eurocoll Plus. In caso di forte assorbenti ripulire dalla polvere le superfici e applicare un primer.

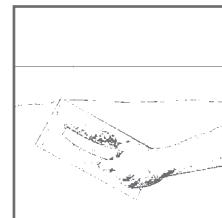

Immediatamente dopo l'incollaggio stendere uno strato di Eurocoll Plus diluito come ponte adesivo sulla superficie del Climapron Plus.

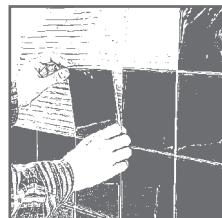

Gli adesivi e i punti adesivi applicati successivamente devono asciugare bene. Si consiglia di controllare l'asciugatura del Climapron Plus in più punti mediante tentativi di distacco.

Tappezzerie e coperture di pareti possono essere incollate utilizzando appositi adesivi, a seconda della tipologia utilizzata.

Pitture a base di resina artificiale, in dispersione applicati a rullo possono essere applicati sul Climapron Plus senza dovere porre strati di armatura se a base cementizia, se invece sono prodotti a base di gesso, si consiglia di utilizzare sempre l'armatura e la retina.

Le piastrelle da muro possono essere incollate sul Climapron Plus utilizzando un adesivo in dispersione per piastrelle. Dopo una settimana di asciugatura si possono chiudere le giunture fra le piastrelle.
